COURSEWORK

POSTGRADUATE

Python Programming
Backend Development
Data Structure
Database Management System
Operating Systems

SKILLS

PROGRAMMING

Experienced:
Python • JavaScript • HTML • REST API • Django • LaTeX • Flask• Postgres•
Intermediate:
Heroku • Nginx • Gunicorn• VPS• Linux• Vercel• Ubuntu • GCP • SQLite •
Postman •TailwindCSS •CSS
Familiar:
Git •GitHub • FireBase • Node • React

PROJECTS

FLASK APP | FLASK PYTHON TODO APP

- Implemented a robust To-Do application using Flask.
- Web framework in Python, and integrated SQLite as the database backend with Flask-SQLAlchemy.
- It follows the CRUD (Create, Read, Update, Delete) paradigm for task management.

DJANGO JOB PORTAL WEBSITE | ONLINE JOB PORTAL WEBSITE

- Django web app includes Employers and job seekers Main two sections.
- Django-powered online job portal provides robust authentication features.
- Employers can easily post job listings.
- Job seekers can apply and upload their resumes, making it a seamless platform for connecting employers with qualified candidates.
- Job Portal:// **:Website Link**

USER DASHBOARD | AUTHENTICATION SIGN IN AND SIGN OUT

- The User Dashboard aims to provide users with a secure and intuitive sign-in/sign-out dashboard.
- Upon entering valid credentials, users can successfully sign in and access their personalized data.
- This project ensures that only authorized users can access the dashboard.
- User Dashboard:// **:Website Link**
